***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/2/02 has been entered.

Claims 5-8 and 18-24 are pending in this application.

***Claim Rejections - 35 USC § 112***

Claims 18-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "unsubstituted or substituted camptothecin analog" renders the claims indefinite because one skilled in the art cannot say what the intended substituents are and where these substituents are supposed to be. Surely, Applicants do not intend any and all substituents (arsenic, uranium, polymers, nucleotides, sugars, proteins, etc.) at every location of the molecule. Also, one cannot say what constitutes an analog of camptothecin and when a compound is not "analog of camptothecin." The nature and number of substituents permitted is not known. Therefore the metes and bounds of the compound could not be ascertained. Applicant's arguments have been fully considered but they are not persuasive because the metes and bounds of a claim should be known. It is understood that the inventive concept in the instant claims lies

Art Unit: 1624

in the 7-membered lactone. However, all advances in the art are limited to minor modifications of the camptothecin structure such as substitutions on the camptothecin.

Applicants are also reminded that although the claims are interpreted in light of the specification, critical limitations from the specification cannot be read into the claims (see, e.g., *In re Van Guens*, 988 F.2d 1181, 26 PSPG2d 1057 (Ded. Cir. 1991)). Accordingly, without the recitation of all these critical limitations, the claims do not adequately define the instant invention.

Claims 5-8 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
